Gardening Tip: Time of Day to Water

The best time to water is in the morning, when the air is cooler and there is usually less wind. This allows your plants to absorb the most water before the hottest part of the day.

While watering early in the day is best, it is important to water plants whenever they need it. If the soil is dry and your plants are wilting, water as soon as you can.

Be sure to check out the City's website for all Ordinances & Resolutions. We also post Minutes from City Council Meetings, Pavilion Rental Forms, copies of past & current City Newsletters and MORE! www.grassvalleyoregon.com
