**Community Meeting:**  
**Thursday, September 15<sup>th</sup>**  
**7:00 PM**  
**Grass Valley Pavilion**

**COMMUNITY QUESTIONNAIRE**  
**For A Potential City of Grass Valley**  
**Municipal Sewer System Project**

**IF** a municipal sewer system, including sewer collection system, pump station and treatment lagoon was built in the City of Grass Valley and;

- A sewer line extension was constructed on a road located within 50 feet or less from your property, and;
- Connection to it, along with abandonment for any existing septic system was *paid for by the City* if you connected within 6 months of construction; Costs may increase if not connected within the first 6 months of construction.
- And, the monthly cost of service was approximately \$72.50 per month once connected; This is *in addition* to the current monthly charge for water of \$45.00 per month.
- And, the cost of the connection and septic tank abandonment would be *paid by the property owner* if they did not connect within 6 months.

What would you do?

- Would connect to the new sewer *immediately or within 6 months*
- Would connect *after 6 months but before five years*
- Not sure when or if we/I would connect.

***Please note that responding "Would connect" does not and will not obligate you in any way to connect to the proposed City of Grass Valley Municipal Sewer Treatment System, should it occur.***
